

We've Got it Covered

Whatever your business, Allied Waste Services offers a full range of service options and equipment to meet all your waste-collection needs—efficiently and economically.

Our team of experienced, highly trained drivers and support staff provides organized, timely service and safe operation. Our waste-service experts can help you choose the right container system as well as advise you on understanding environmental and workplace regulations that affect your particular needs.

We feature a variety of container options to best suit your waste volume and accessibility needs. Likewise, we can customize your container with accessories, such as rolling casters, tow hooks, overhead hooks, locks and plastic lids. Easily loadable with full swing-away lids, our containers are constructed of heavy-gauge steel that resists rust and leaks, reduces fire hazards, and aids in pest control. Our container swap program ensures that your containers will be cleaned, repaired and replaced when requested.

With our flexible scheduling, we quickly can respond to your changing waste-collection needs. Our full range of well-maintained equipment and trained professionals assures you of the most cost-effective and reliable service available.

We maintain an inventory of containers in a variety of sizes as well as flexible collection scheduling. Let our waste-collection specialists recommend and design a system specifically tailored for you.
